
AGMScore

Accessibility Conformance Report

WCAG Edition

(Based on VPAT® Version 2.5)

Name of Product:

AGM | DocConform | ACM website (<https://www.agmscore.com/>)

Report Date:

June 17th, 2026

Product Description:

AGM is an accessibility governance system of record. It consolidates audit findings, remediation status, attestations, and your regulatory obligations, and expresses program health as a single, evidence-based score with the full audit trail behind it. It works on its own and pulls in data from DocConform and ACM if you run them.

Contact information:

Email: info@accessibilitypartners.ca

Evaluation Methods Used:

Accessibility testing as per WCAG 2.2 AA guidelines.

The evaluation was performed using below tools/ tests:

- Screen readers:
 - NVDA on Win11/ Chrome
 - VoiceOver on iPhone/ Safari
- WAVE automated tool
- Color contrast testing using Color Contrast Analyzer
- Browser zoom
- Keyboard-only
- Text-spacing testing using bookmarklets

Notes:

The VPAT has been prepared based on the accessibility evaluation of the following pages/ flows:

https://www.agmscore.com/
https://www.agmscore.com/about
https://www.agmscore.com/acm
https://www.agmscore.com/agm
https://www.agmscore.com/contact
https://www.agmscore.com/docconform

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standards/guidelines:

Standard/Guideline	Included in Report
Web Content Accessibility Guidelines 2.2 at https://www.w3.org/TR/WCAG22/	Level A (Yes) Level AA (Yes) Level AAA (No)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion.

WCAG 2.x Report

Note: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the [WCAG 2.0 Conformance Requirements](#).

Table 1: Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations
<u>1.1.1 Non-text Content</u> (Level A)	Supports	Images and other non-text content include appropriate alternative text that conveys equivalent information to assistive technologies.
<u>1.2.1 Audio-only and Video-only (Prerecorded)</u> (Level A)	Not Applicable	No multimedia content is present on the website.
<u>1.2.2 Captions (Prerecorded)</u> (Level A)	Not Applicable	No multimedia content is present on the website.
<u>1.2.3 Audio Description or Media Alternative (Prerecorded)</u> (Level A)	Not Applicable	No multimedia content is present on the website.
<u>1.3.1 Info and Relationships</u> (Level A)	Supports	The website provides consistent headings, lists, and structure, allowing screen readers to identify content and relationships effectively.
<u>1.3.2 Meaningful Sequence</u> (Level A)	Supports	The content on the website is presented in a meaningful sequence that does not affect users' understanding of the information.
<u>1.3.3 Sensory Characteristics</u> (Level A)	Supports	No instructions or information on the website rely solely on sensory characteristics such as shape, size, visual location, orientation, or sound.
<u>1.4.1 Use of Color</u> (Level A)	Supports	Color is not used as the only visual means of conveying information, indicating actions, prompting responses, or distinguishing visual elements.
<u>1.4.2 Audio Control</u> (Level A)	Not Applicable	No audio content is present on the website that plays automatically for more than 3 seconds.
<u>2.1.1 Keyboard</u> (Level A)	Supports	All interactive elements on the website support standard keyboard navigation and input functions

		(including screen reader gestures such as swiping between elements and double-tapping to activate controls).
<u>2.1.2 No Keyboard Trap</u> (Level A)	Supports	Keyboard focus moves sequentially throughout the website without becoming trapped in any section.
<u>2.1.4 Character Key Shortcuts</u> (Level A 2.1 and 2.2)	Not Applicable	No functionalities are dependent on or controlled by character key shortcuts.
<u>2.2.1 Timing Adjustable</u> (Level A)	Not Applicable	The website does not contain time-limited activities requiring users to adjust or extend time limits.
<u>2.2.2 Pause, Stop, Hide</u> (Level A)	Not Applicable	No moving, blinking, scrolling, or auto-updating content is available on the website.
<u>2.3.1 Three Flashes or Below Threshold</u> (Level A)	Not Applicable	There is no flashing content present on the website.
<u>2.4.1 Bypass Blocks</u> (Level A)	Supports	A mechanism is available to bypass repeated content, allowing users to quickly navigate to the main content section.
<u>2.4.2 Page Titled</u> (Level A)	Supports	Descriptive and accurate page titles are present for all pages on the website.
<u>2.4.3 Focus Order</u> (Level A)	Supports	Focus order is logical and meaningful across the website, allowing users to navigate content in a predictable sequence.
<u>2.4.4 Link Purpose (In Context)</u> (Level A)	Supports	All links provide descriptive and meaningful text, allowing users to understand their purpose from the link text alone or in context.
<u>2.5.1 Pointer Gestures</u> (Level A 2.1 and 2.2)	Supports	The website functionality can be operated using simple pointer interactions. No multipoint or path-based gestures, such as pinch, swipe, or drag gestures, are required to access or operate any functionality.

<u>2.5.2 Pointer Cancellation</u> (Level A 2.1 and 2.2)	Supports	No functionality is triggered solely by the down-event of a pointer.
<u>2.5.3 Label in Name</u> (Level A 2.1 and 2.2)	Supports	Labels on the website include text and the same text is defined in the code as well to assist speech recognition technologies.
<u>2.5.4 Motion Actuation</u> (Level A 2.1 and 2.2)	Not Applicable	No functionality is present on the website that is operable only by device motion.
<u>3.1.1 Language of Page</u> (Level A)	Supports	The language attribute is correctly defined for all webpages.
<u>3.2.1 On Focus</u> (Level A)	Supports	No interactive element is triggered automatically on receiving the focus.
<u>3.2.2 On Input</u> (Level A)	Supports	Change of context does not happen when the user changes the setting of any input controls.
<u>3.2.6 Consistent Help</u> (Level A 2.2 only)	Supports	Help mechanisms, such as contact details, are consistently available across the website.
<u>3.3.1 Error Identification</u> (Level A)	Supports	The website provides error messages when required form fields are left empty or invalid data is entered.
<u>3.3.2 Labels or Instructions</u> (Level A)	Supports	Form fields and interactive controls on the website include appropriate labels and instructions to help users understand the expected input and functionality.
<u>3.3.7 Redundant Entry</u> (Level A 2.2 only)	Not Applicable	No such user input is required on the website.
<u>4.1.2 Name, Role, Value</u> (Level A)	Supports	Website elements expose appropriate name, role, and value information to assistive technologies.

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
<u>1.2.4 Captions (Live)</u> (Level AA)	Not Applicable	No multimedia content is present on the website.
<u>1.2.5 Audio Description (Prerecorded)</u> (Level AA)	Not Applicable	No multimedia content is present on the website.
<u>1.3.4 Orientation</u> (Level AA 2.1 and 2.2)	Supports	The website does not restrict its view and operation to a single display orientation.
<u>1.3.5 Identify Input Purpose</u> (Level AA 2.1 and 2.2)	Supports	Input fields on the website are designed to support identification of user information and improve form usability for assistive technologies.
<u>1.4.3 Contrast (Minimum)</u> (Level AA)	Supports	Text and visual elements on the website meet the minimum color contrast requirements.
<u>1.4.4 Resize text</u> (Level AA)	Supports	The website is fully responsive. At a zoom of 200%, no loss of content or functionality is observed.
<u>1.4.5 Images of Text</u> (Level AA)	Supports	The website does not use images of text to convey information.
<u>1.4.10 Reflow</u> (Level AA 2.1 and 2.2)	Supports	The website does not require scrolling in two dimensions to present content without loss of information in 400% zoom.
<u>1.4.11 Non-text Contrast</u> (Level AA 2.1 and 2.2)	Supports	The website user interface components have a contrast ratio of at least 3:1 against adjacent color(s).
<u>1.4.12 Text Spacing</u> (Level AA 2.1 and 2.2)	Supports	The website supports WCAG text spacing requirements.
<u>1.4.13 Content on Hover or Focus</u> (Level AA 2.1 and 2.2)	Supports	The content that is triggered by hover or focus is dismissible, hoverable, and persistent.

2.4.5 Multiple Ways (Level AA)	Supports	The website contains a limited number of pages that can be easily located through the primary navigation and contextual links.
2.4.6 Headings and Labels (Level AA)	Supports	Headings and labels on the website provide sufficient detail of the content they are describing.
2.4.7 Focus Visible (Level AA)	Supports	Interactive elements present on the website have focus visibility.
2.4.11 Focus Not Obscured (Minimum) (Level AA 2.2 only)	Supports	All elements that receive keyboard focus are at least partially visible upon receiving the focus.
2.5.7 Dragging Movements (Level AA 2.2 only)	Not Applicable	The website does not include functionality that requires dragging movements.
2.5.8 Target Size (Minimum) (Level AA 2.2 only)	Supports	Interactive pointer targets are at least 24 by 24 CSS pixels or have sufficient spacing around them.
3.1.2 Language of Parts (Level AA)	Not Applicable	There are no phrases or sentences in another language that require separate language identification.
3.2.3 Consistent Navigation (Level AA)	Supports	Navigational mechanisms that are repeated across the website occur in a consistent relative order, providing users with predictable and consistent navigation throughout the website.
3.2.4 Consistent Identification (Level AA)	Supports	Components that provide the same functionality throughout the website can be easily identified by the user.
3.3.3 Error Suggestion (Level AA)	Supports	The website provides descriptive error messages and suggestions to help users identify and correct invalid or incomplete form input.
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Not Applicable	No legal, financial, or irreversible data submission processes were identified where enhanced error prevention is required.

<u>3.3.8 Accessible Authentication (Minimum)</u> (Level AA 2.2 only)	Not Applicable	The website does not include authentication or login mechanisms; therefore, this criterion does not apply.
<u>4.1.3 Status Messages</u> (Level AA 2.1 and 2.2)	Supports	Updated content and status messages are programmatically conveyed, allowing screen reader users to be notified of changes without requiring focus movement.
